

Imerys Ipoh receives National Occupational Safety and Health Excellence Award in Malaysia

Imerys Minerals Malaysia Ipoh received the National Occupational Safety and Health Excellence Award in Malaysia. This award is the highest safety distinction awarded by the Malaysian government. Winning in the “Mine and Quarry” category marks a significant milestone in the continuous improvement of our mining operations within the region. The redesign the mine and the process of implementing new mining methods took a lot of time and effort. This award recognizes the achievement of all of those who invested their time and resources into making Imerys Ipoh a safer, more efficient mine. Imerys Ipoh continues to operate with the same diligence and energy towards further improvements of safety in our mine and plant.
