

Imerys Carbonates to Participate in Renewal and Remembrance Day at Arlington National Cemetery

Placing high importance on serving local communities, Imerys Carbonates will sponsor and volunteer at the annual Renewal & Remembrance Day at Arlington National and Historical Congressional Cemeteries on July 20, 2015. This event provides a great opportunity to give back and to honor American military personnel who gave their lives in service to the United States of America.

As a lime and calcium carbonate supplier, Imerys Carbonates has been donating the lawn care product Lime-Rite® for this annual event for over 25 years, including enough to help maintain the cemetery grounds throughout the rest of the year. As a member of the National Association of Landscape Professionals, Imerys Carbonates has been a Gold sponsor of the event for 6 years, contributing over \$60,000 in monetary donations and participating annually in the day of service.

Several representatives from Imerys Carbonates will be there mulching, cabling, pruning, liming, and aerating more than 200 acres of Arlington National and Historic Congressional cemeteries alongside other volunteers.

LimeRite® neutralizes soil acidity, improves soil structure, and liberates plant nutrients for healthier and greener grass. In addition to LimeRite®, Imerys Carbonates mines and manufactures a wide array of calcium carbonate products that enhances people's daily lives; from Food & Pharmaceuticals, to Building and Construction, Polymers and Coatings, Paper, and many more.

Imerys Carbonates is one the world's largest producers of white industrial minerals.
